(Movie #2)

ADDICTED TO PLASTIC

From styrofoam cups to artificial organs, plastics are perhaps the most ubiquitous and versatile material ever invented. No invention in the past 100 years has had more influence and presence than synthetics. But such progress has had a cost. For better and for worse, no ecosystem or segment of human activity has escaped the shrink-wrapped grasp of plastic. *Addicted To Plastic* is a global journey to investigate what we really know about the material of a thousand uses and why there's so darn much of it. On the way we discover a toxic legacy, and the men and women dedicated to cleaning it up.

Wednesday, February 27th

4:30pm to 6:30pm
