Viewers will meet urban children in Chicago learning about local foods and ecological restoration. They'll learn about ranchers in Arizona and New Mexico who maintain healthy landscapes by working on their own properties and with their neighbors, in cooperative community conservation efforts. They'll meet wildlife biologists who are bringing back threatened and endangered species, from cranes to Mexican wolves, to the landscapes where they once thrived. The *Green Fire* film portrays how Leopold's vision of a community that cares about both people and land—his call for a land ethic—ties all of these modern conservation stories together and offers inspiration and insight for the future.
